

Safety and Adventure

... with AZDEL Composite Panels "ONBOARD".
Proven technology used in RV's since 2006

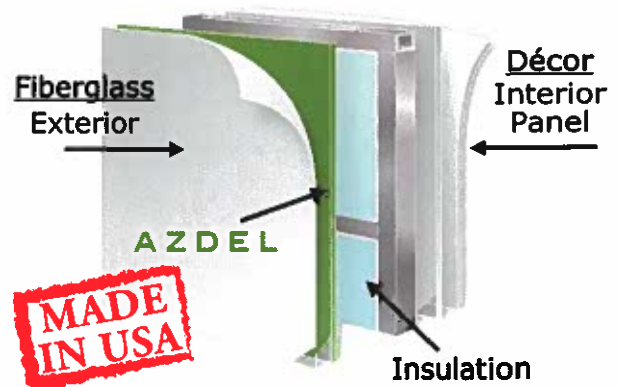

AZDEL Composite Panels

AZDEL Composite Panels have been used in RV Exterior and Interior sidewall, ceilings, and roofs since 2006.

AZDEL Composite Panels are constructed using a blend of polypropylene and fiberglass creating a strong, lightweight, quiet, water resistant, temperature resistant, odorless and environmentally friendly wall that will increase the life of your RV.

50% Lighter

Long Life

Made in USA

Knock on Wood: Traditional Wood Sidewall

- Absorbs and retains water
- Affected by humidity and temperature changes
- Susceptible to mold, rot, warpage and delamination
- Imported
- Reflects noise
- Heavier

Water Damage to a Luan sidewall

Avoid Costly Water Damage

Water and wood don't mix

Water can rot, mold, and delaminate wood sidewall panels causing thousands of dollars in damage

Soak Test

- 60 Day Water Soak Test
- Wood has visible mold and decay requiring wall to be repaired
- AZDEL was 100% unaffected
